

INDUSTRY DEVELOPMENT AND SUPPORT

Energy Safety Canada is the nation's oil and gas safety association. We collaborate with industry, government, educators and training agencies to support the upstream and midstream sectors.

SETTING THE STANDARD
IN OIL AND GAS SAFETY

These are just some of the ways we can help your company keep workers safe, save money and, ultimately, improve safety performance.

INDUSTRY-LEADING RESOURCES

Energy Safety Canada has ready-made resources to help you with everything from your team safety meetings to developing a safety management system.

- ▶ Industry Recommended Practices (IRPs): developed in collaboration with industry and provide recommended practices for technical and health and safety management in upstream operations.
- ▶ Program Development Guidelines and Resources: implement new safety programs within your company or further progress existing ones.
- ▶ Safety Alerts: learnings and recommendations from actual incidents submitted by industry.
- ▶ Safety Bulletins: proactive news and tips on timely safety topics.
- ▶ Toolbox Talks: ready-made safety meeting presentations on a variety of topics.
- ▶ Webinars on Demand: Past webinars on a wide range of safety topics are recorded and available to watch on demand.
- ▶ Videos, posters and checklists for a variety of safety topics are all available on our website.

SAFETY TRAINING

Energy Safety Canada and our nation-wide network of Authorized Training Providers (ATPs) ensure workers are ready to work safely when they arrive at the worksite.

- ▶ Delivery methods include online, classroom and worksite training.
- ▶ Courses can be customized to meet your company's specific requirements.

EVENTS

Stay informed and learn from industry experts.

- ▶ Workshops, lunch-and-learns, regional meetings, sharing of best practices, webinars and conferences are offered throughout the year on a wide range of safety topics.
- ▶ To subscribe to notifications for events in your area, visit EnergySafetyCanda.com.

CERTIFICATE OF RECOGNITION (COR)

Proven way for employers to improve health and safety performance, create a culture of proactive health and safety, and reduce costs associated with workplace incidents.

- ▶ Energy Safety Canada is the COR Certifying Partner for the oil and gas industry.
- ▶ We are the only Certifying Partner that offers multi-province CORs.

INJURY DATA

Energy Safety Canada has a contractual relationship with workers compensation boards in BC, Alberta and Saskatchewan. Using WCB injury and illness data, we provide employers with reports that:

- ▶ Compare your company's safety performance with others in your industry peer group.
- ▶ Highlight trends for sector-specific injury data.
- ▶ Focus on specific strategies to improve your health and safety outcomes.

SAFETY SUPPORT

Improve safety performance, empower your workers and reduce compensation costs with Energy Safety Canada's customized safety support, advice and resources.

- ▶ Schedule one-on-one consultations and work with you over time to identify safety issues and develop action plans.
- ▶ Help you identify safety gaps through activities like risk assessments, bowtie analyses, and more.
- ▶ Perform a gap analysis for areas such as onboarding, return to work plans, safety management systems and COR audits.
