

ENFORM PETROLEUM SAFETY CONFERENCE

DR. JOE MACINNIS

Highlights from his May 9, 2013 presentation

“Leadership is *empathy*—for the team, the task, and the technology. Develop the emotional intelligence to monitor your own and your team’s emotional state.

“Leadership is *endurance*—knowing your values and having the strength and stamina to succeed in the mission—no matter how long or how difficult. Aim for fabulous fitness.

“Leadership is *eloquence*—speaking and writing with accuracy, brevity, and clarity. To command the moment, you must command the language.
