

MURRAY ELLIOTT

PRESIDENT & CEO

As the President and CEO, Murray directs the strategic path and development of Energy Safety Canada, the national oil and gas safety association.

Appointed President in 2017, he successfully led the organization during the merger of Enform and Oil Sands Safety Association (OSSA) to form Energy Safety Canada. Now as President and CEO, Murray continues to lead the vision and strategy of the new organization.

After studying Chemical Engineering at the University of Toronto, Murray began his career in the oil and gas industry with Shell Canada in 1986. During his 30 years with the multi-national company, he held progressively senior roles in development and production.

Murray's leadership roles in industry associations include the Canadian Association of Petroleum Producers' (CAPP) Board of Governors, Alberta Executive Policy Group (EPG) and Oil Sands EPG, as well as chairing and participating in industry-regulator committees. As President, Oil Sands Developers Group (OSDG), he led the industry review that later transformed OSDG into the present-day Oil Sands Community Alliance (OSCA). Murray also served on the Enform Board of Directors prior to the merger forming Energy Safety Canada.
