# LIFE SAVING RULES

Toolbox Talk

Safe Mechanical Lifting

SETTING THE STANDARD IN OIL AND GAS SAFETY

ENERGY  
SAFETY  
CANADA

# OUTLINE

---

- ▶ 10 Life Saving Rules
- ▶ Description of Safe Mechanical Lifting Rule
- ▶ Additional Guidance
- ▶ Roles & Responsibilities
- ▶ Example Violations
- ▶ Related Life Saving Rules
- ▶ Summary

# ENERGY SAFETY CANADA'S 10 LIFE SAVING RULES

**CONFINED SPACE**

**WORKING AT HEIGHT**

**WORK AUTHORIZATION**

**ENERGY ISOLATION**

**LINE OF FIRE**

**BYPASSING SAFETY CONTROLS**

**DRIVING**

**HOT WORK**

**SAFE MECHANICAL LIFTING**

**FIT FOR DUTY**

## SAFE MECHANICAL LIFTING RULE

---

- ▶ Plan lifting operations and control the area
  - ▶ I confirm that the equipment and load have been inspected and are fit for purpose
  - ▶ I only operate equipment that I am qualified to use
  - ▶ I establish and obey barriers and exclusion zones
  - ▶ I never walk under a suspended load

## ADDITIONAL GUIDANCE

---

- ▶ Safe mechanical lifting applies to **any equipment or loads** that are lifted by mechanical means
- ▶ A **suspended load** is an object that is temporarily lifted and hangs above the ground. This applies to equipment and loads that have not been designed for workers to be beneath it during operation.
- ▶ A **lift plan** identifies the weights and dimensions, how the lift will progress, communication requirements (signal personnel), and weather and ground conditions.
- ▶ **Line of fire** is a significant risk with overhead loads and moving equipment

## AS A SUPERVISOR

---

- ▶ I ensure workers are competent to operate the mechanical lift
- ▶ I ensure a lift plan is in place and that workers follow the plan
- ▶ I ensure barriers and exclusion zones are established, communicated and adhered to by site personnel

## AS A WORKER

---

- ▶ I have the required training and knowledge to safely perform work
- ▶ I ensure I am fit for duty
- ▶ I follow the lift plan
- ▶ I inspect the lifting equipment and adhere to all certification requirements

## AS A WORKER - CONTINUED

---

- ▶ I confirm the lift equipment is fit for purpose and I operate the lifting equipment below its working load limits
- ▶ I ensure line of fire hazards in relation to overhead power lines are identified, marked, and a safe distance is maintained
- ▶ I use tag lines to position suspended loads
- ▶ I adhere to barriers and exclusion zones

## EXAMPLE VIOLATIONS

---

- ▶ The lift operator is not competent to conduct the lift, but does so anyway
- ▶ The lift operator is not fit for duty, but conducts the lift anyway
- ▶ A lift is conducted without a lift plan
- ▶ The lift equipment and load are not inspected prior to the lift
- ▶ The lift is conducted with equipment that does not have the proper certifications

## EXAMPLE VIOLATIONS - CONTINUED

---

- ▶ A lift is conducted beyond its working load limits
- ▶ A safe distance is not maintained from overhead powerlines
- ▶ The load is positioned using worker's hands instead of tag lines, putting the workers under the suspended load
- ▶ Barriers and exclusion zones are not established

# RELATED LIFE SAVING RULES

**FIT FOR DUTY**

**WORK  
AUTHORIZATION**

**DRIVING**

**WORKING AT  
HEIGHT**

**LINE OF FIRE**

## SUMMARY

---

- ▶ Know your role and responsibilities in relation to the Safe Mechanical Lifting rule
- ▶ Notify your supervisor immediately if your are unsure about how to comply with this rule in your work environment
- ▶ If you see a potential violation of the Safe Mechanical Lifting rule, intervene – it could be the last chance to prevent a fatality
- ▶ Consistent application of the Life Saving Rules equates to saved lives
- ▶ These rules are essential to achieving industry’s shared vision: zero injuries, zero incidents
